## Desirable Places to Plant a Tree Northern Staten Island - Community Board 1

## Legend

## **Planting Index**

100 = most desirable place to plant

cmap

Criteria used to determine the Planting Index:

0.5

- 1) Population density the greater the population density, the greater the priority for tree planting
- 2) Tree stocking levels the lower the tree stocking level (percent of available greenspace that is occupied by tree canopies) the greater the priority for tree planting
- 3) Tree cover per capita the lower the amount of tree canopy cover per capita, the greater the priority for tree planting
